Fergus Falls

Wetland Management District

Comprehensive Conservation Plan and Environmental Assessment

Comprehensive Conservation Plans provide long-term guidance for management decisions; set forth goals, objectives and strategies needed to accomplish refuge purposes; and, identify the Fish and Wildlife Service's best estimate of future needs. These plans detail program planning levels that are sometimes substantially above current budget allocations and, as such, are primarily for Service strategic planning and program prioritization purposes. The plans do not constitute a commitment for staffing increases, operational and maintenance increases, or funding for future land acquisition.

Acknowledgments

Many organizations, agencies and individuals provided invaluable assistance with the preparation of this Comprehensive Conservation Plan. We gratefully acknowledge the input and support of Tom Larson, Mike Marxen, John Schomaker, Mary Mitchell, Sean Killen, and Jane Hodgins, Planners with the Division of Ascertainment and Planning and all of the dedicated employees of the Wetland Management Districts of the U.S. Fish and Wildlife Service.

Region 3 of the U.S. Fish and Wildlife Service is grateful to the many conservation organizations active in western Minnesota for their dedication to the Wetland Management Districts in making them outstanding examples of cooperation and partnership with the many local communities. The Region is equally grateful to every volunteer who contributes time to the programs offered on the Wetland Management Districts. You are truly the backbone of conservation efforts.
